“ It is with great sadness that I write this sympathy message for my uncle David Fairey. David was a gentle and kind soul and a loving father, brother, uncle and friend. He was dealt a difficult hand from day 1, not living with his birth family for most of his childhood and suffering with Ankylosing Spondylitis (a severe form of arthritis) in his back and neck for all of his adult life. It took its toll on his physical health, but he remained upbeat and positive and did the best he could given the circumstances of his condition and health. He will be greatly missed by his family, Margaret, Nathaniel and the rest of the Fairey family and friends in Peterborough. Mark Fairey
