“ You don't go searching for your mentor, you just happen to come by them. The really good ones go along with you for as long as the road takes them, and teach you not in words but in actions. I lost my mentor My friend. My well wisher. Steve was my first boss. My first guide in my career. He taught me how to lead. He kept in touch with me for 25+ long years, never forgetting a Birthday or Christmas. There aren't many like him in this world. I just hope one day I can be just as impactful to someone else. You will be missed beyond words! #mentor #friend #boss #AmazingHuman #neverforget
